

Anushka Bansode

AI/ML Engineer | LLM & Agentic Systems

Pune, India | anushkabansode348@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Pre-final year B.E. Artificial Intelligence & Data Science undergraduate specializing in applied AI/ML engineering, LLM application development, and agentic systems. Built and deployed multiple production-style RAG pipelines, autonomous AI agents, and deep learning systems using LangChain, Groq API (Llama), FastAPI, Docker, and cloud platforms (Railway, AWS).

Technical Skills

Languages: Python, SQL

LLM / GenAI: LangChain, Groq API (Llama 3.1 / 3.3), RAG Pipelines, Autonomous AI Agents, Agentic Tool-Calling, Prompt Engineering, Conversational Memory

ML / Deep Learning: TensorFlow/Keras, EfficientNet, Scikit-learn, Random Forest, Model Evaluation (ROC-AUC)

Vector Databases & Embeddings: ChromaDB, sentence-transformers, Similarity Search

Deployment & Tools: Docker, Docker Compose, FastAPI, REST APIs, GitHub REST API, Streamlit, Git, Railway, AWS EC2, SQLAlchemy

Databases: PostgreSQL, MySQL

Professional Experience

Data Science Intern

Jan 2026 – Feb 2026

ScaleFull Technologies, Pune, India

- Processed 50K+ rows of business data; extracted, cleaned, and transformed real-world datasets using Python (Pandas, NumPy) and SQL for downstream analysis.
- Performed end-to-end exploratory data analysis to identify trends and patterns, translating findings into structured stakeholder reports.

Projects

RepoPulse – AI Agent for GitHub Repository Health Evaluation | Python, LangChain, Groq (Llama), FastAPI, PostgreSQL, Streamlit, Railway GitHub | Live API | Live App

- Designed an autonomous AI agent that evaluates GitHub repository health – commit activity, documentation quality, and code structure – via LangChain-orchestrated LLM reasoning over the Groq API, returning plain-English verdicts with confidence scores.
- Built a FastAPI backend with a PostgreSQL persistence layer and a Streamlit UI including a repository compare mode; deployed live on Railway for public access.

HR Policy RAG Chatbot | LangChain, ChromaDB, Groq (Llama 3.1), FastAPI, Docker, Streamlit

GitHub

- Built a Retrieval-Augmented Generation chatbot answering employee HR queries, grounded in company policy PDFs via ChromaDB vector search, sentence-transformer embeddings, and a LangChain + Groq Llama 3.1 conversational chain returning cited source chunks to prevent hallucination.
- Exposed the pipeline via a FastAPI REST endpoint with auto-generated Swagger docs and containerized both services with Docker Compose.

EyeScan – AI Retinal Disease Detection | Python, EfficientNetB0, TensorFlow, Streamlit

GitHub

- Trained an EfficientNetB0 model to classify Cataract, Glaucoma, and Diabetic Retinopathy from fundus images, achieving 92% test accuracy and 97.58% validation accuracy; deployed a Streamlit diagnostic demo for real-time predictions.

Text-to-SQL Intelligence App | Python, LangChain, Groq (Llama 3.3), PostgreSQL, Streamlit

GitHub

- Built an LLM-powered app converting natural language to PostgreSQL queries using LangChain and Groq API, handling multi-table JOINS, aggregations, and CTEs with automatic error-retry and schema-aware context injection on a 500K+ row dataset.

Education

Dr. D. Y. Patil College of Engineering, Pune

2022 – 2027

B.E. in Artificial Intelligence & Data Science (Pre-Final Year)

SPPU

Relevant Coursework: Machine Learning, Deep Learning, DBMS, Statistics, Python Programming

Publications & Achievements

- Co-Author, Credit Card Fraud Detection** – Research paper published on ResearchGate, co-authored with Vishal Puranik.
- Live Hackathon Builder** – Designed, trained, and deployed a deep learning model end-to-end within a single 6-hour window at KaggleHacX '26.

Certifications

AWS Cloud Foundations (AWS) | Data Analytics & Data Science (Tutetude) | Software Engineering & Agile (Infosys Springboard)
